

William Romero

Orlando, FL | (754) 218-7857 | williamromer4000@gmail.com | LinkedIn | GitHub | Portfolio | U.S. Citizen

SUMMARY

CompTIA Security+ certified IT professional (B.S. Information Technology, UCF 2026) with hands-on experience in Active Directory administration, network troubleshooting, identity and access management, and enterprise technical support across university and MSP environments. Skilled in VPN, VoIP, DNS, and infrastructure support using PowerShell, ServiceNow, and Linux-based systems.

CERTIFICATIONS

CompTIA Security+ (SY0-701) Issued May 2025 | Expires May 2028

AWS Academy Cloud Foundations | AWS Academy Cloud Security Foundations | TestOut IT Fundamentals Pro | CompTIA Network+

TECHNICAL SKILLS

Security: Active Directory security, least-privilege access control, vulnerability assessment, packet capture analysis, Kerberos, incident analysis fundamentals, Nmap, Netcat, Wireshark

Networking: TCP/IP, DNS, DHCP, VPN, VoIP, Ethernet, Wi-Fi, Cisco Packet Tracer, network reconnaissance, service enumeration

System Administration: Linux (Samba AD, DNS, NTP), Windows Server, Active Directory, Group Policy, PowerShell, Bash, SSH/SFTP, cron jobs

Languages & Tools: Python, C, C++, Java, Ruby, HTML, MySQL, ServiceNow, GitHub, ticket lifecycle management, SLA tracking

PROFESSIONAL EXPERIENCE

IT Support & Systems Administrator Assistant | UCF (Dept. of Mathematics) — Orlando, FL December 2024 – April 2026

- Administer Active Directory environments for 100+ user accounts, enforcing least-privilege access controls and automating provisioning tasks with PowerShell to reduce administrative overhead
- Validate authentication, DNS, and directory services through systematic testing and log analysis, resolving infrastructure issues before impacting faculty, staff, and students
- Support departmental IT operations by configuring user access, managing workstation support, and handling sensitive academic materials in accordance with university security and chain-of-custody procedures

Tier 2 Technical Support Technician (Remote) | Altice USA (Optimum) — New York, NY August 2022 – April 2023

- Managed the full incident lifecycle in ServiceNow for 50+ weekly support tickets, including logging, prioritization, SLA tracking, escalation, and resolution documentation for business clients across network connectivity, VoIP, VPN, and Ethernet environments
- Performed security-aware remote diagnostics within business network environments, troubleshooting VPN access failures, VoIP degradation, and connectivity issues while maintaining SLA compliance and detailed root cause documentation

Fiber Optic Technician | Hotwire Communications — Lake Nona, Florida January 2022 – July 2022

- Installed and validated fiber optic infrastructure supporting internet, television, and phone services for approximately 450+ residential units across multiple housing developments in the Lake Nona area
- Diagnosed and resolved fiber connectivity and service issues during active residential deployments to maintain installation timelines and service availability

SECURITY PROJECTS

VLAN Segmentation & Inter-VLAN Routing Lab March 2026

- Configured VLAN-based network segmentation and inter-VLAN routing using Cisco switches, router sub interfaces, and IEEE 802.1Q trunking in Cisco Packet Tracer
- Implemented subnetting, trunk links, and router-on-a-stick architecture to simulate enterprise network isolation and secure communication between departments

Linux Active Directory Lab November 2025

- Built and administered a Linux-based Active Directory environment using Samba AD, Kerberos, DNS, and NTP in a multi-server virtualized lab environment
- Configured centralized authentication, user/group permissions, and least-privilege access controls while automating administrative tasks with Bash, PowerShell, and SSH

EDUCATION

B.S. Information Technology — University of Central Florida 2022 – April 2026

M.S. Cybersecurity & Privacy Technical Track (accepted) — University of Central Florida | M.S. Cybersecurity Information Security Track (accepted) — Georgia Tech Spring 2027
